Suitable For
Bariatric Needs

The Forte 320 Patient Lifter with integrated powered bariatric pivot frame and integrated weigh scale is a compact, ergonomic designed heavy-duty mobile patient lifting hoist with a safe working load of 320kg. It is the optimal hoist for reduced manual handling risks with integrated powered bariatric pivot frame and integrated weigh scale.

With robust powder coated steel construction this lifter is ideally suited for institutional use or as a compact heavy-duty home care hoist for the bariatric patient. The Forte 320, whilst being compact, offers superior patient lift space through the combination of the recessed actuator and the use of SPACE LINK™ technology. The unique feature of SPACE LINK™ allows a patient to be rotated through 360° at full lift height, thus making the carers job easier and safer.

The Forte 320 Lifter provides infection control advantages through the aesthetic design of the concealed electric leg spread mechanism. The Forte 320 lifting range allows patients to be lifted from the floor, bed or chair with ease and safety. The Forte 320 is a powered unit using trusted industry leading LINAK components, giving a safe working load (SWL) of 320kg. The Forte 320 Patient Lifter is the lifter of choice where a high capacity bariatric lifter is required.

Product Features:

- Supplied complete with battery, in-built battery charger and instruction manual.
- Safe Working load of 320kg
- Battery life indicator on lifter as well as handset
- Additional up and down buttons on control box
- Australian Owned and Made
- Powered Bariatric Pivot Frame, operated by handset
- Integrated Weighing Device
- Compatible with our Staebel Slings

Specifications:

Product Code	2901
Base Length	1420 mm
External Base Width Open/Closed	1200 / 715 mm
Internal Base Width Open/Closed	1080 / 600 mm
Maximum Hoist Reach	810 mm
Under Bed Clearance	111 mm
Under Bed Base Height	15 mm
Yoke Height	245 - 1940 mm
Overall Height (Boom Raised)	2243 mm
Minimum Storage Height	1445 mm
Lifter Weight	63 kg
Mass of Heaviest Part (Chassis)	37 kg
SWL	320 kg
