Suitable For
Stage 4

The StarLock Cushion is a prime wheelchair cushion offering ultimate positioning, unparalleled stability and the highest level of therapeutic prevention & treatment of pressure injuries up to and including stage 4. Instead of locking air in sections, the StarLock allows the user to stop the flow of air between each cell in the cushion.

StarLock can work as a single air chamber cushion allowing individual setup for optimal pressure redistribution. In addition, it is possible to lock air in each vertical air cell. The individual cell locking technology aids stability and allows individualised postural support. The StarLock cushion is suited for individuals who require air cell cushion but need maximum stability and/or postural support, e.g., pelvic obliquity, foot propulsion, amputation.

Product Features:

- **Unlimited Positioning:** Provides diverse positioning possibilities, ensuring optimal user comfort.
- **Outstanding Pressure Redistribution:** Offers exceptional pressure relief qualities for enhanced comfort.
- **Airflow Lock Technology:** Features patented airflow locking between cells for stability and tailored positioning.
- **Adaptive Cell Structure:** Adapts to body structure, minimising tissue deformation and promoting comfort.
- **Therapeutic Prevention and Treatment:** Provides the highest level of prevention and treatment for pressure injuries.
- **Envelopment Ability:** Envelopment capability is influenced by the cell height, allowing users to sink into the cushion for ultimate immersion.
- **Incontinence Covers Available:** Additional incontinence covers can be purchased separately.
- **Inclusive Package:** Comes with a fitted cover and hand pump for added convenience.
- Easy Cleaning for Cushion
- ARTG Number: 339953
- Standards: EN 12182:2012; ISO13485
