**At Nestie,
we believe
maternity care
should feel
safe, calm, and
deeply human.**

We design maternity equipment with a singular purpose — to support mothers, babies, families, and the clinicians who care for them during life's most meaningful moments. Every Nestie product is shaped by real clinical insight, thoughtful design, and a commitment to quality that goes beyond functionality.

By combining innovation with empathy, Nestie creates solutions that enhance comfort, reduce strain, and support connection. From the first moments of birth to recovery and bonding, our equipment is designed to quietly support care — allowing families and healthcare teams to focus on what matters most.

Matters Most

Nestie Nova Maternity Bed

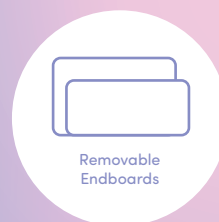

Product Code: 7-NOVA

The Nestie Nova Maternity Bed is thoughtfully engineered to support every stage of the birthing journey, from antenatal care through to delivery and recovery. Combining exceptional strength, clinical functionality, and comfort-driven design, Nova empowers midwives and clinicians while ensuring mothers feel supported, safe, and at ease.

With a Safe Working Load (SWL) of 300kg, the Nestie Nova delivers outstanding durability and stability without compromising manoeuvrability or comfort. Its electric hi-low adjustment reduces manual handling strain, promotes safe transfers, and supports optimal working heights for caregivers.

Designed with versatility in mind, the Nova easily transitions between routine maternity care and active birthing scenarios. The optional removable leg stirrups enable safe and efficient positioning for both natural births and medical examinations, while the electric backrest and kneebreak allow effortless repositioning for comfort, feeding, bonding, and recovery.

Proudly Australian Made and Owned, the Nestie Nova reflects a commitment to quality craftsmanship, local manufacturing, and healthcare compliance — giving facilities confidence in performance, service, and long-term support.

Nestie Novus Maternity Partner Bed

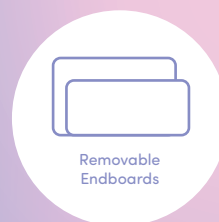

Product Code: 7-NOVUS

The Nestie Novus Maternity Partner Bed is purpose-designed to support family-centred care, enabling partners to remain close, comfortable, and actively involved throughout the maternity journey.

By providing a safe, supportive sleeping space within the maternity room, Novus helps strengthen bonding, encourages shared caregiving, and enhances emotional wellbeing — all while maintaining the clinical functionality required by care teams.

Thoughtfully engineered with electric height adjustability, the Novus supports safer transfers, reduces manual handling strain, and allows clinicians to deliver care with ease and efficiency. Its robust construction and generous surface area ensure comfort for partners without compromising room workflow or accessibility.

Proudly Australian Made and Owned, the Nestie Novus reflects a commitment to quality manufacturing, durability, and long-term support — giving healthcare facilities confidence in both performance and compliance.
