

Staebel Gel Segment Bed Pads

staebel 

Product Code: 3853

The Staebel bed segments are made of Akton polymer and used for optimal pressure relief.

The Staebel bed segments are made of Akton polymer which mimics human fatty tissue in consistency, does not migrate like gel and provides equally distributed pressure management. These bed pads can be used to cover the entire surface or isolated areas of an existing standard mattress. You can use one, two or three segments in combination on their areas of need e.g. shoulders and hips, feet and hips or full body etc.

- Easily cleaned, no maintenance
- Not restricted by any weight limit
- Each sold separately
